PROFESSIONAL SUMMARY

Full-stack developer with a B.Sc. in Computer Science (University of Western Macedonia, 2026) and hands-on experience building and deploying web and mobile applications. Works with React, JavaScript and TypeScript on the web, Kotlin and Jetpack Compose on Android, and Node.js / Express and Java / Spring Boot on the back end, with PostgreSQL and MongoDB. Shipped projects include an AI nutrition scanner released on Android, a real-time grocery price-comparison PWA and Android app, and an Android sound-library app with its own REST API. Available immediately for remote or on-site roles.

TECHNICAL SKILLS

Languages: Java, Kotlin, JavaScript, TypeScript, HTML5, CSS3, SQL

Front-End: React, Vite, PWA, GSAP

Mobile: Kotlin, Jetpack Compose, Capacitor

Back-End: Node.js, Express, Spring Boot, Hibernate / JPA, REST APIs, Vercel Functions

Databases: PostgreSQL, MongoDB, Supabase

AI: Gemini and Claude APIs, vision prompts, structured JSON output

PROJECTS

Nufo — AI Nutrition Scanner

Live: nufo.vercel.app

Nutrition scanner: photograph a plate and a Gemini vision model names every food with its grams, with calories verified against USDA data; scan a barcode for Nutri-Score, NOVA and additives. Label photos fill in missing product data. Released on Android with in-app updates.

Technologies: Kotlin, Jetpack Compose, Gemini AI, Vercel Functions, USDA FNDDS, Open Food Facts, ML Kit

Live: <https://nufo.vercel.app> · Code: <https://github.com/TPAINN/nufo>

Smart Grocery Hub — Kalathaki

Live: kalathaki.vercel.app

Full-stack PWA and Android app for real-time grocery price comparison across 8 Greek supermarkets, with an AI-powered meal planner, barcode scanning and live shared carts — product prices collected through an automated Puppeteer pipeline.

Technologies: React 19, Capacitor, Express, MongoDB, Puppeteer, Socket.IO

Live: <https://kalathaki.vercel.app>

RingVault

Live: ringvault.vercel.app

Android app offering curated, legally free (CC0 / CC-BY) ringtones, notification sounds and alarms with one-tap setup via MediaStore. An automated weekly ingest pipeline (Freesound, Pixabay) keeps the library fresh, served by a Node.js / Express API on MongoDB.

Technologies: Kotlin, Jetpack Compose, ExoPlayer, Node.js, Express, MongoDB

Live: <https://ringvault.vercel.app> · Code: <https://github.com/TPAINN/ringvault>

MindFeed

Live: mindfeed-tpainn.vercel.app

Progressive web app that counters doom-scrolling with daily, science-backed knowledge cards in a calm, distraction-free reading experience.

Technologies: React, Vite, PWA, Node.js

Live: <https://mindfeed-tpainn.vercel.app> · Code: <https://github.com/TPAINN/mindfeed>

Additional projects

- **Shft** — gym planner and workout tracker for Android: plans, set logging, progress (React, Capacitor, Supabase). <https://shftapp.vercel.app>
- **Zenith Strength System** — gym management platform: members, trainers, classes, CRM, payroll and point of sale (Java, Spring Boot, Hibernate, PostgreSQL, React). Private repository.
- **Aurora Player** — web music player with word-level karaoke lyrics and beat-reactive visuals (React, Web Audio API, YouTube API). <https://aurora-player-tpainn.vercel.app>
- **Portfolio Website** — single-file static site with custom cursor, scroll-driven animation and a PDF certificate viewer. <https://apostolos-peiniris.vercel.app> · <https://github.com/TPAINN/apostolos-peiniris>
- **Vortex — Marketing Site** — animated pre-launch site with email waitlist for an upcoming Android app. <https://vortex-site-pi.vercel.app> · <https://github.com/TPAINN/vortex-site>

WORK EXPERIENCE

Waiter — Vento Gelateria Pasticceria, Preveza 2024 – 2025 (4–5 months)

Front-of-house service at a gelateria and pastry shop.

Bar Assistant — Alila Tales & Spirits, Preveza Summer Season 2024

Supported bar operations during the peak summer season.

Waiter — Iliovasilema, Alonaki Beach, Pantokratoras, Preveza Summer Seasons 2021 – 2023

Front-of-house restaurant service during peak summer seasons.

EDUCATION

B.Sc. Computer Science (Informatics) 2020 – 2026

University of Western Macedonia — Kastoria, Greece

Coursework: Object-Oriented Programming (Java), Data Structures, Algorithms, Databases (SQL / NoSQL), Computer Networks, Operating Systems, Software Engineering, Artificial Intelligence, Web Development.

50 / 50 courses completed · 270 ECTS · Final grade 6.61 / 10 (Very Good) · Degree awarded June 2026.

General High School Diploma — STEM 2017 – 2020

1st General Lyceum of Preveza, Greece

Grade 19.1 / 20 (Excellent) · Mathematics 18.5 · Computer Science 19.5 · English 19.5.

Hellenic Army — Military Service Completed Completed November 2025

625 M/P Unit, Ioannina · Specialty: Infantry / Driver

Fully discharged — no pending obligations.
