

Apostolos Peiniris

FULL-STACK DEVELOPER

apostolos.peiniris@gmail.com · +30 694 788 9505 · Preveza, Greece

github.com/TPAINN · apostolos-peiniris.vercel.app · linkedin.com/in/apostolos-peiniris-a02a961a5

Full-stack developer with a B.Sc. in Computer Science, building web and mobile applications with React on the web, Kotlin and Jetpack Compose on Android, and Node.js / Express and Java / Spring Boot on the back end, with PostgreSQL and MongoDB. Shipped an AI nutrition scanner on Android, a real-time grocery price-comparison PWA and Android app, and an Android sound-library app with its own REST API. Available immediately for remote or on-site roles.

TECHNICAL SKILLS

LANGUAGES	Java, Kotlin, JavaScript, TypeScript, SQL	FRONT-END	React, Vite, PWA, HTML5, CSS3
MOBILE	Jetpack Compose, Capacitor	BACK-END	Node.js, Express, Spring Boot, Hibernate / JPA
DATABASES	PostgreSQL, MongoDB, Supabase	AI	Gemini and Claude APIs

SELECTED PROJECTS

Nufo — AI Nutrition Scanner

[LIVE](#) · [CODE](#)

Nutrition scanner: photograph a plate and a Gemini vision model names every food with its grams, with calories verified against USDA data; scan a barcode for Nutri-Score, NOVA and additives. Label photos fill in missing product data. Released on Android with in-app updates.

[Kotlin](#) · [Jetpack Compose](#) · [Gemini AI](#) · [Vercel Functions](#) · [USDA FNDDS](#) · [Open Food Facts](#)

Smart Grocery Hub — Kalathaki

[LIVE](#)

Full-stack PWA and Android app for real-time grocery price comparison across 8 Greek supermarkets, with an AI-powered meal planner, barcode scanning and live shared carts — product prices collected through an automated Puppeteer pipeline.

[React 19](#) · [Capacitor](#) · [Express](#) · [MongoDB](#) · [Puppeteer](#) · [Socket.IO](#)

RingVault

[LIVE](#) · [CODE](#)

Android app offering curated, legally free (CC0 / CC-BY) ringtones, notification sounds and alarms with one-tap setup via MediaStore. An automated weekly ingest pipeline (Freesound, Pixabay) keeps the library fresh, served by a Node.js / Express API on MongoDB.

[Kotlin](#) · [Jetpack Compose](#) · [ExoPlayer](#) · [Node.js](#) · [Express](#) · [MongoDB](#)

MindFeed

[LIVE](#) · [CODE](#)

Progressive web app that counters doom-scrolling with daily, science-backed knowledge cards in a calm, distraction-free reading experience.

[React](#) · [Vite](#) · [PWA](#) · [Node.js](#) · [MongoDB](#) · [Claude API](#)

Shft — Gym Planner

[LIVE](#)

Android gym planner and workout tracker that turns scattered sessions into a repeatable system: build a plan, learn the lifts, log sets, review and track progress.

[React](#) · [Capacitor](#) · [Supabase](#) · [GSAP](#)

ADDITIONAL PROJECTS

Zenith Strength System — gym management platform with members, classes, CRM, payroll and POS (Spring Boot, Hibernate, PostgreSQL, React).	Private repository
Aurora Player — web music player with word-level karaoke lyrics and beat-reactive visuals.	aurora-player-tpainn.vercel.app github.com/TPAINN/aurora-player
Portfolio Website — single-file static site with custom cursor, scroll-driven animation and a PDF certificate viewer.	apostolos-peiniris.vercel.app github.com/TPAINN/apostolos-peiniris
Vortex — Marketing Site — animated pre-launch site with email waitlist for an upcoming Android app.	vortex-site-pi.vercel.app github.com/TPAINN/vortex-site
Weather Dashboard — real-time weather with current conditions, forecasts and location-based data.	weather-app-tpainn.vercel.app
